

# Skye

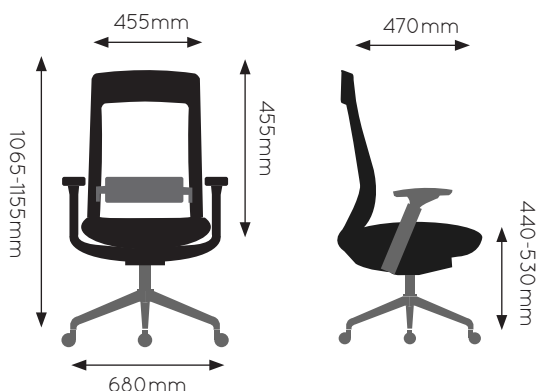

**Visually stunning, offering comfort and simplicity.**

Claremont Centre Skye task chair delivers sophisticated support for all-day comfort with a crisp, modern, innovative design. It's packed with a range of ergonomic characteristics designed to bring comfort while working, making this a perfectly versatile chair for any office environment.

- The synchronous mechanism (synchro tilt) combines a movement of the backrest and a corresponding smaller movement of the seat. The movement of the backrest is thereby larger than the movement of the seat.
- Breathable mesh upholstery allows increased airflow and helps prevent body heat and moisture build up, keeping you cool as you work!
- The automatic adjustable weight-controlled mechanism increases or decreases back seat and tilt resistance. This ensures that the back rest reclines smoothly when you lean back.
- The ergonomically shaped backrest with pronounced integrated lumbar support and height adjustable arms provides maximum support and encourages a good posture for long hour sitting.
- Skye features a lockable adjustable backrest that offers four tilting positions, adjusting the backrest to an ideal posture to relieve pressure on the waist and spine. It can tilt forward up to 10° and tilt backwards up to 23° for enhanced comfort.
- Designed for comfort and flexibility, the depth of the soft foam seat can be adjusted with Skye's sliding seat functionality, and with gas seat height adjustment the chair can be set to achieve users' optimum height.

#### Guarantee:

5 Year Structural, Mechanism Guarantee  
3 Year Fabric and Mesh Guarantee

#### Specifications and Standard Features:

- Synchro mechanism
- Breathable mesh back measuring 640 mm high
- Fully integrated adjustable lumbar support
- 3D height adjustable armrest
- Seat slide functionality
